B. Kolormakeup & Skincare S.P.A. Sb – Benefit Corporation Mattifix Over and Under Liquid Powder

Product description

Mattifix’s liquid powder formulation boasts a dual nature: it can be used as a base, to deliver a perfected, soft-focus finish, or on top of make-up, to retouch and mattify throughout the day. This multitasking action means that the formula achieves both the subtlety of a low coverage make-up base combined with the power of a make-up fixer. The formula’s blend of powders creates its soft-focus effect, smoothing the skin’s surface, minimizing imperfections, and delivering a matte finish. It also contains an encapsulated botanical complex, composed of magnolia and willow, acting as an anti-inflammatory shield that prevents dryness and signs

Formulation | Finalist

of aging. The powder’s pigments are coated with polysaccharides for a uniform application that achieves a low coverage veil of color, which harmonizes with the wearer’s skin tone.

Claims & Benefits

This innovation, known as Mattifix, is a cutting-edge liquid powder that effortlessly glides onto the skin, providing immediate evening out and Mattifying Effect. Its delicate yet potent layer ensures long-lasting perfection, enhancing the skin's natural radiance. With this single, multifunctional product, you can achieve a refined, Natural Look while simultaneously setting or retouching your makeup for enduring perfection. It's essentially two high-efficiency products in one, Always Ready to uniquely enhance your beauty with professional-grade results.

COLEP CONSUMER PRODUCTS

Smiley Heads Sebum-Control Scalp Serum

Formulation | Finalist

Colep Consumer Products Smiley Heads Sebum-Control Scalp Serum

Product description

A serum that reduces sebum and oil production in the scalp, by targeting the root causes of oily hair, while at once normalizing the scalp's microbiota, improving hair's resilience, and allowing extended time between shampoos. The serum's ingredients are supported by scientific research, and the formula is composed of 98% natural ingredients. In instrumental tests, the serum proved a 14% reduction in sebum after two weeks of use, while 95% of consumers confirmed that the formula significantly reduced oil and grease in their hair, and 86% of consumers agreed that using the product prolonged time between washes. Formulated to be invisible, this leave-in treatment has an ultra-

lightweight texture and can be used on both damp and dry hair.

Claims & Benefits

This unique product transcends ordinary scalp care, delivering professional-grade efficacy to extend the time between shampoos. Instrumental testing proved a substantial reduction in sebum of 14% after 2 weeks while 95% of consumers confirmed the formula's ability to significantly reduce the formation of oil and grease in the hair. Additionally, 86% concur the product proactively and effectively prolongs intervals between washes. Powerful but invisible, this featherlight serum, seamlessly integrates into any hair routine, whether applied to damp or dry locks, without disrupting hair style. Working to ingeniously purify and rebalance the scalp's natural ecosystem to enhance overall hair vitality.

ICURE PHARMACEUTICAL INC.

Pepta Balancing Toner

ICURE Pharmaceutical Inc.

Pepta Balancing Toner

Product description

Bringing anti-aging, antioxidant, and reparative benefits in a toner formulation, the Pepta Balancing Toner contains a five-peptide complex. This ingredient's benefits include promoting collagen production, improving hydration, and reducing the signs of aging. Its creamy formulation blends the peptide complex with amino acids, helping to preserve the skin's barrier and improve skin elasticity. It also contains natural ceramide produced via a 100% green process, which strengthens the skin barrier, while panthenol and vegetable squalane both act as effective moisturizers. While the peptide complex helps to repair the skin and diminish the appearance of fine lines and wrinkles, the toner is also

Formulation | Finalist

infused with antioxidants to protect against oxidative stress and brighten the skin.

Claims & Benefits

Hydration: Peptides helps to retain moisture in the skin, leading to improved hydration levels. **Firmness and elasticity:** Making the skin firmer, more elastic skin by stimulating collagen production, **Anti-aging:** By supporting collagen production and improving skin elasticity, it helps reduce the appearance of fine lines and wrinkles. **Skin repair:** helping to heal damaged skin and improve overall skin health. **Antioxidant properties:** It has antioxidant properties, which can help protect the skin from environmental damage and oxidative stress. **Brightening:** helping to even out skin tone and reduce the appearance of dark spots or hyperpigmentation.

SOLÉSENCE BEAUTY SCIENCE

Lip Oil SPF 40+ featuring Kleair™

Solésence Beauty Science

Lip Oil SPF 40+ featuring Kleair™

Product description

This Lip Oil combines sun protection, antioxidant effects, and SPF 40+ in a formula that comes in 12 vibrant shades. The SPF 40+ acts to protect lips from over 97% of UV rays, thus combatting premature skin aging, including the appearance of fine lines and wrinkles. The formula is created with Solésence's Kleair technology, which allows for the mineral-based, non-nano zinc oxide sunscreen to be delivered in a lightweight texture. Kleair™ is billed as "zinc oxide reinvented with extremely high transparency, a more efficient response to UV, and unparalleled free radical quenching." The formula also contains naturally derived squalane for moisturization and anti-aging benefits, meadowfoam seed oil, and calming and soothing bisabolol. Alongside its UV

Formulation | Winner

protection, the formula reduces free radical-induced pollution by more than 85%.

Claims & Benefits

Lips are skin, too -- and Lip Oil SPF 40+ brings the technical sophistication of innovative skincare to the lip category. Patented, award-winning Kleair™ facilitates the luxurious application of mineral-based, broad-spectrum SPF 40+ sunscreen -- protecting lips from 97%+ of UV radiation, preventing premature skin aging and the appearance of fine lines and wrinkles, and reducing pollution-induced free radicals by over 85%. Alongside technology-enabled claims, sustainably produced, naturally-derived squalane provides natural moisturization and anti-aging benefits, and key sustainable ingredients draw attention to the environmental footprint of this water-free formula.

Coradin S.A.S.
GREENIS® Dispenser

CORADIN S.A.S.
GREENIS® Dispenser

Packaging: Design & Materials | Winner

Coradin S.A.S. GREENIS® Dispenser

Product description

Developed by Coradin, originally for Dermalogica, this dispenser packaging is designed to optimize recyclability and be intuitive for the consumer to use. While dosing droppers are usually composed of glass or multi-materials, this dropper component has been made with over 97% PP which simplifies its recyclability with the full PP pack. The dispenser only has three components and is made from almost all mono-material PP and PCR-PP, except for TPE which is used for 3% of the finished dispenser, utilized for the actuation button on the dispenser's side. The weight of the dispenser is 14.6

grams, representing an 18.6% reduction in weight compared to the previous dispenser used by Dermalogica. With a push button on the side, the consumer can hold it like a pen for ease of use and precise dosage. The dispenser has been certified as compatible with a PP recycling stream by Germany's Cyclos-HTP Institute.

Claims & Benefits

Consumer Experience : • The push button was designed on the side to improve the ergonomics of the application and increase accuracy. • Increase intuitive design. • Precise dosing (pressure control between 2 fingers like a pen) • Reduce consumer use damage (more robust button and intuitive gesture).

DOUEN CO., LTD.

Eco Auto Dropper

Packaging: Design & Materials | Finalist

Douen Co., Ltd.
Eco Auto Dropper

Product description

The Eco Auto Dropper is crafted with a four-part design that is composed of recycled and recyclable plastics and a glass bottle. This pared-back construction helps minimize the Eco Auto Dropper's environmental impact, compared to that of traditional droppers. The design features an auto loading system, allowing it to deliver a controlled application of the liquid product. Only composed of four parts, the Eco Auto Dropper represents a sustainable alternative for products presented in dropper bottles.

Claims & Benefits

The Eco Auto Dropper: Effortless dispensing. 4-part eco-design for easy use, affordability, & less waste.

ELCOS GROUP

EAP-416RK

Packaging: Design & Materials | Finalist

Elcos Group EAP-416RK

Product description

To make the refill process as easy as possible for the consumer, Elcos' refillable glass airless series is designed so that the inner PP bottle is simply dropped into the outer glass bottle to complete the refill process. Initiating the assembling and disassembling process is simple, too, only requiring the pump top to be screwed off the bottle and removing the inner bottle from the outer bottle. After use, the PP refill component and the outer glass bottle can be recycled separately, with the packaging composed of glass and recyclable plastic only. In addition to this packaging design

encouraging reuse, Elcos incorporates renewable energy into its production process, with solar energy powering its injection process.

Claims & Benefits

This product certainly provides a unique solution to a need in the current and foreseeable market demand. The product incorporates the 3Rs (Reduce, Reuse, Recycle) concept in its totality from its production, to its usage, and to the end of life. However, what's unique with our product is not only the simplicity of the refill aspect but also the incredibly beautiful design that isn't seen anywhere else and is exclusive to Elcos.

SAMHWA CO., LTD.

Simple & Easy Refill Stick 20g & 9g

Packaging: Design & Materials | **Finalist**

Samhwa Co., Ltd.

Simple & Easy Refill Stick 20g & 9g

2. Adorable and stylish aesthetics

Product description

Designed with a slide mechanism, the Simple & Easy Refill Stick has been conceived to be easy and intuitive for the consumer to refill. Available in both 20-gram and 9-gram sizes, the stick is designed to look stylish alongside encouraging consumers to use refills – rather than throw the entire pack away – thus maximizing the packaging’s lifespan, ultimately reducing plastic use. The stick is designed in mono material PP, which makes it easy to recycle.

Claims & Benefits

1. Eco-friendly mono material product and easy to refill and reuse.
