## ADVANCED BEAUTY LABS

Bronze The Competition Serum

### Product description

Bronze the Competition is a high-performance serum that delivers both instant glow and long-term skin benefits. Born from the demand for multi-tasking skincare with visible payoff, it blends Copper Peptides, Nanopeptide 1, and Turmeric for hydration, brightening, and tone evening results. Powered by HydroSal® ReVive time-release technology, it works beyond the surface while providing a radiant bronzy finish.

### Claims & Benefits

Delivers an instant bronzy glow with a smooth, natural finish. Hydrates

Formulation | Finalist

with Hyaluronic Acid and Squalane. Brightens and evens tone with Nanopeptide-1 and Niacinamide. Firms and supports elasticity with Copper Peptides. Powered by HydroSal® ReVive for time-released delivery and lasting results. Lightweight, non-greasy texture layers seamlessly under makeup. Suitable for all skin tones and types. Dermatologist-tested, cruelty-free, and formulated without parabens, sulfates, or phthalates. This serum is a true skincare-makeup hybrid—combining visible radiance with real performance for glow that lasts beyond the spotlight.

## **BKOLOR MAKEUP**

Spreading Powder Multimoisture Powder

### **Product description**

A powder formula that incorporates cocoa, coconut, and cupuaçu butters – and is inspired by the nourishment that honey and butters provide – to create a creamy, moisturizing powder finish. Available in both blush and bronzer versions, the cocoa and coconut butters within the formula nourish and hydrate alongside delivering a silky and velvety sensation, while the cupuaçu butter creates a further layer of softness. Added to this, an amino acid lends creaminess to the formula and an ester that mimics honey’s barrier-like qualities leaves the skin hydrated

and comfortable. The formula is free from talc and micro-plastics, and leaves a veil of soft, comfortable-feeling color on the face with a natural finish.

Artemisia Calming Serum

**Formulation | Winner**

**ICURE PHARM & COSMETICS INC.**

Artemisia Calming Serum

**Product description**

Artemisia Capillaris, also known as Korean mugwort, is a resilient Eastern herb that thrives through Korea's harsh summers and winters. This high-performance soothing serum contains PDRN extracted from mugwort, known for its calming and skin-repairing properties. It absorbs smoothly with a silky, non-sticky finish, making it gentle even for sensitive skin. Combining natural soothing benefits with regenerative power, it helps restore skin balance and clarity. Ideal for daily use on all skin types.

**Claims & Benefits**

This high-performance soothing serum contains vegan PDRN refined through an eco-friendly process without phenol or chloroform. Formulated with 13 types of hyaluronic acid and centella asiatica extract, it deeply hydrates and strengthens the skin. PDRN boosts collagen and hyaluronic acid production, helping to firm and revitalize. Developed as a clean beauty formula, it is gentle enough for sensitive skin and excellent for calming and barrier support. The silky, non-sticky texture absorbs smoothly, making it ideal for daily use on all skin types. Technical details

## CARESSA KAHN MANUFACTURING COMPANY LIMITED

New Ultra Thin Puff with Integrated Film

### Product description

Our Ultra Thin Cosmetic Puff with Integrated Film allows you to get rid of bulky compacts. Thinking slim means removing 4-5 different actions needed to open your compact, find the applicator, lift the powder and apply it to your face. The integrated film attached to our puff acts as a hygienic seal, bringing back user-friendly, stylish slim compacts, allowing the puff to be accessed and the powder to be lifted in a single simple action. The film separates the powder from the applicator. Less plastic, eco-friendly, thinner compacts - a return to

elegance.

### Claims & Benefits

Our puff with integrated film removes the need for extra filling equipment to install original style loose film into the compact - normally problematic on filling lines owing to static and speed of production. Attaching film directly to the puff makes it more stable and much easier to incorporate into automatic/manual systems. The integrated film facilitates production of usable uncompromised compacts with reduced dimensions/weight, allowing manufacturers to return to more elegant packaging designs, rather than compacts that can be filled cheaply in production plants. This results in energy saving, less waste with lower production, shipping and storage costs.

### KNOLL PRINTING & PACKAGING

Knoll Ecoform Molded Pulp Compact

### KNOLL PRINTING & PACKAGING

Knoll Ecoform Molded Pulp Compact

#### Product description

Introducing the Molded Pulp Compact Refill with Tab Closure—an innovative sustainable beauty packaging solution made from plant based fibers like bamboo wood and sugarcane Fully recyclable and biodegradable this plastic free compact features a secure tab closure for repeated use and a sleek lightweight design that optimizes storage and reduces shipping emissions Its single material construction requires no disassembly simplifying recycling and composting With customizable color embossing and print options it offers a premium branded look A molded interior platform and thumb notch ensure easy refill removal Scalable efficient and eco conscious this compact supports refill

culture and circular beauty.

#### Claims & Benefits

Made from renewable plant fibers, it is fully biodegradable, recyclable, and plastic-free—eliminating the need for disassembly or special recycling processes. Its lightweight structure reduces transportation emissions, while the space-saving design allows efficient stacking and flat-packing. Molded pulp uses a closed-loop water system, conserving resources during production. The single-material design simplifies disposal and encourages responsible consumer behavior. Durable and customizable, it supports luxury branding with embossing, vat-dyeing, and printing. Its refillable format reduces waste, aligning with circular economy principles and setting a new standard in sustainable beauty packaging.

**SPEECHLESS**  
LIP MAKEUP BRUSHES

**PENNELLI FARO**  
Speechless

**Packaging: Design & Materials** | **Finalist**

## **PENNELLI FARO**

Speechless

### **Product description**

**FOCUS: #LIPS** - The lips take center stage with the #SPEECHLESS applicator collection. These applicators allow for a celebration of the art of lip makeup, providing the precision needed to #outline, fill in, and touch up with perfection. The Speechless lip brush collection offers a functional and precise approach to lip makeup, featuring four specialized brushes designed to enhance each step of the application process. The Perfect Lips brush combines two functions in one. Its specially shaped tip allows for both precise outlining and seamless filling, making it easy to achieve bold, defined lips with a single tool. The Flat Lip brush is designed to reach the inner corners of the lips, ensuring no detail is left untouched. Its flat shape helps define the lip contour and lift the

corners, enhancing symmetry and creating a more refined mouth shape. The Pro Lip brush is ideal for working with creamy formulas, such as lipsticks and glosses. It ensures smooth, even application without streaking, making it perfect for those who seek a flawless, blended finish. The Detail Lip brush delivers exceptional precision, allowing for sharp, clean lines and perfect lip contours. This brush is perfect for intricate lip art or defining the lips with high accuracy. Overall, the Speechless collection responds to the growing demand for specialized tools that offer both precision and versatility. Whether for professional makeup artists or beauty enthusiasts, this range meets the need for refined lip looks with tools designed for every detail of application. The collection reflects the current trend toward personalized, high-performance beauty tools that elevate the makeup experience..

**SHINKWANG M&P**  
Air Mist

**Packaging: Design & Materials**

**Winner**

**SHINKWANG M&P**

Air Mist

**Product description**

Shinkwang M&P's Air Mist bottle incorporates a core Airless Pump technology that eliminates air bubbles in the container, to ensure a fine mist spray. The container uses natural compressed air instead of liquefied petroleum gas to ensure a continual spray action while being eco-friendly. With the airless mist technology offering efficiency, versatility, and the ability to create a fine, even mist, it's particularly suited to skin care and cosmetic formulations. Patents for the concept have been obtained both domestically and internationally, with the packaging targeted at brands

looking for packaging solutions for facial and body mists.

**Claims & Benefits**

"The 'pumping dispenser' eliminates air bubbles in the container 'Airless Pump', a core technology that eliminates air bubbles in the container and controls the amount of fine discharge. To eliminate bubbles in the container and control the amount of fine discharge."
